

The Landscape

34 Gallon Perforated Container with Domed Lid

This perforated recycling bin is ideal for parks, downtowns, stadiums and other outdoor recycling settings. Both body and lid are powder coated inside and out in an eye catching royal blue for recycling containers and black for trash containers.

The new dome lid design, for the recycling unit, keeps out rain and trash, with restricted 5" diameter openings and clear labels. The dome lid is secured with a plastic coated steel cable to prevent theft and vandalism. A crisp white CANS/BOTTLES ONLY graphic surrounds each opening, with chasing arrows in between.

The body features a laser cut RECYCLE or TRASH graphic. There are two steel retainer bands to hold liner bags in place. Pre-drilled mounting holes in back of unit allow for mounting to poles, walls or fences and pre-drilled holes in bottom of unit allow for in-ground mounting with the anchor kit included! Made in the USA with over 30% recycled material content. ADA Compliant.

Dimensions

Capacity	34 Gal
Body	18" Dia x 44" H
Weight	38 lbs.
